

Notice

March 26, 2010

Ref. 2010-H-101

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in March 2010 to consider Ontario Power Generation's (OPG) application to amend Pickering Nuclear Generating Station A (PNGS-A) and Pickering Nuclear Generating Station B (PNGS-B) Nuclear Power Reactor Operating licences. PNGS-A and PNGS-B are located in the locality of Pickering in Ontario.

OPG has requested the following changes: a revision of the PNGS-A "Operating Policies and Principles" document to reflect the status of Units 2 and 3 in a guaranteed defueled state; a revision to the PNGS-B "Safety Report, Parts 1 and 2" as part of their obligation under licence condition 1.6; and an update to the "Site Security Taut-Wire Fence Layout and Survey Drawing" applicable to the PNGS-A and PNGS-B site.

The Commission has determined that a public hearing is not necessary to consider the modifications requested by OPG.

Following the deliberations, the Commission's decision on this matter will be made available to the public on the CNSC Web site.

The Commission will consider written submissions from CNSC staff and OPG.

CNSC staff's recommendations and OPG's submission are not available on-line and must be requested through the Secretariat at the address below:
