# Notice of Hearing

---

June 9, 2010

Ref. 2010-H-106

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in June 2010 to consider Ontario Power Generation Inc. (OPG)'s application for the Darlington and Pickering A and B Nuclear Generating Stations (NGS). The Darlington NGS is located at Clarington, Ontario and the Pickering A and B NGS is located at Pickering, Ontario.

OPG is seeking acceptance from the Commission for administrative changes in its Darlington and Pickering A and B Nuclear Power Reactor Operating licences. These changes include updates to revisions of documents and changes to licence conditions to reference to a specific section of the organizational change control document.

The Commission has determined that a public hearing is not necessary to consider OPG's request in this case. There is no opportunity for the public to participate. The hearing will be conducted by way of written submissions from CNSC staff and OPG.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations and OPG's hearing submission are not available on-line and must be requested through the Secretariat at the address below:

c/o Julie Bouchard
