# Notice of Hearing

---

June 16, 2010

Ref. 2010-H-107

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in June to consider Ontario Power Generations' (OPGs') licence amendment requests for the Darlington, Pickering and Western waste management facilities operating licences. These facilities are located in Clarington, Pickering and Kincardine, Ontario.

OPG is requesting administrative updates to all three of its waste management facility licences and Appendix B licence references. OPG also requested licence amendments to reflect changes to documentation regarding pressure boundary requirements and the revised financial guarantee approved by the Commission on December 9, 2009.

The Commission has determined that a public hearing is not necessary to consider OPG's requests in this case. There is no opportunity for the public to participate. The hearing will be conducted by way of written submissions from CNSC staff and OPG.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations and OPG hearing submission are not available on-line and must be requested through the Secretariat at the address below:
