

Notice of Hearing

September 10, 2010

Ref. 2010-H-113

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in September to consider Denison Mines Inc. (Denison)'s request to perform work at the decommissioned Stanrock mine and to make administrative changes to the current licence. The Stanrock mine is located near Elliot Lake, Ontario.

Denison is seeking approval from the Commission for an amendment to its decommissioning licence to allow the installation of two berms to stabilize and reinforce existing beaver dams. Denison also requested that some administrative changes be made to the licence, including changing the licensee's address and updating documentation referenced in the licence.

The Commission has determined that a public hearing is not necessary to consider Denison's request in this case. There is no opportunity for the public to participate. The hearing will be conducted by way of written submissions from CNSC staff and Denison.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations and Denison's submission are not available on-line and must be requested through the Secretariat at the address below:
