

Notice of Hearing

October 13, 2010

Ref. 2010-H-116

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in October to consider OPG's operating licence amendment requests for the Darlington Nuclear Generating Stations (NGS), Pickering NGS-A and Pickering NGS-B. The nuclear facilities are located in Clarington and Pickering, Ontario.

OPG is requesting administrative updates to the operating licences for its Darlington NGS and Pickering NGS-A and NGS-B, including updates in documentation and changing licence conditions to reference revised criteria for firearms qualification of the nuclear response force.

The Commission has determined that a public hearing is not necessary to consider OPG's requests in this case. The hearing will be conducted by way of written submissions from CNSC staff and OPG.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations and OPG's hearing submission are not available on-line and must be requested through the Secretariat at the address below:
