# Notice of Hearing

---

May 6, 2011

Ref. 2011-H-106

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in May to consider the Environmental Assessment Screening Report (EASR) and licensing action related to the proposal by Cameco Corporation (Cameco) to construct and operate a new water management system at the Cigar Lake mine site. The facility is located in the Cigar Lake area in Northern Saskatchewan.

CNSC staff recommends the Commission to approve the EASR for the proposed Cigar Lake Water Inflow Management Project and approve the construction of the facilities for this project. The operation of the constructed facilities is subject to future approval and will require further details of the operational controls including regular compliance and follow-up program monitoring.

The Commission will consider Cameco's application by way of written submissions, in a closed session. CNSC staff recommendation and Cameco's submission will be available as of May 27, 2011 by contacting the Secretariat at the address below.

The public is invited to comment, in writing, on Cameco's application. Requests to intervene must be filed with the Secretary of the Commission by June 10, 2011 directly on-line at <http://www.nuclearsafety.gc.ca/eng/commission/intervention/index.cfm> or at the address below. The request must include the following information, as per the *Canadian Nuclear Safety Commission Rules of Procedure*:

- a written submission of the comments to be presented to the Commission; and
- name, address and telephone of the requester.

Personal information, such as address and telephone numbers, is essential for linking the submission to its author. Please submit your personal information on a separate page if you wish to ensure its confidentiality. It should be noted that all submissions are available to the public upon request to the Secretariat.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations and Cameco's hearing submission are not available on-line and must be requested through the Secretariat at the address below:
