

Notice of Hearing

December 8, 2011

Ref. 2011-H-120

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in December to consider Hydro-Québec's request to amend the operating licence of the Gentilly-2 Nuclear Generating Station, located in Bécancour, Québec.

Hydro-Québec is asking the Commission to amend its operating licence in order to correct two erroneous derived release limit values in Appendix A.3 of the licence. This amendment will have no implications on the existing physical works or activities at the licensed facility.

The Commission has determined that a public hearing is not necessary to consider Hydro-Québec's request in this case. The hearing will be conducted by way of written submissions from CNSC staff and Hydro-Québec.

Following the deliberations and decisions of the Commission on these matters, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations and Hydro-Québec's hearing submissions are not available online and must be requested through the Secretariat at the address below:
