

Notice of Hearing

March 19, 2012

Ref. 2012-H-105

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in March to consider Ontario Power Generation Inc.'s (OPG) application to amend the Nuclear Power Reactor Operating Licence for the Pickering Nuclear Generating Station B. The facility is located in Pickering, Ontario.

OPG has requested the Commission's approval to replace revision 34 of the document "Operating Policies and Principles" (OP&P) with revision 35 which include the use of Rod Based Guaranteed Shutdown State (RBGSS) as an approved Guaranteed Shutdown State (GSS).

The Commission has determined that a public hearing is not necessary to consider OPG's request in this case. The hearing will be conducted by way of written submissions from OPG and CNSC staff.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

OPG's hearing submission and CNSC staff's recommendations are not available on-line and must be requested through the Secretariat at the address below:
