

Notice of Hearing

March 27, 2012

Ref. 2012-H-108

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in March to consider the proposed Environmental Assessment Screening Report (EASR) for AREVA's proposed project for the receipt and processing of McArthur River ore slurry at the McClean Lake Operation located in northern Saskatchewan.

CNSC staff recommends the Commission to approve the EASR for the proposed project, which includes the operation of the high grade ore slurry receiving area and high grade milling circuits and the processing of ore slurry from the McArthur River mine.

The Commission has determined that a public hearing is not necessary to consider the proposed EASR. The hearing will be conducted by way of written submissions from CNSC staff and AREVA.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations and AREVA's hearing submission are not available on-line and must be requested through the Secretariat at the address below:
