# *Notice of Hearing*

---

May 1, 2012

Ref. 2012-H-111

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in May to consider CNSC staff's recommendation for an exemption from licensing the Greyhawk and Agnew Lake closed uranium mines without tailings (the Agnew Lake tailings will continue to be managed under a CNSC licence). The two mines are located in Bancroft and Sudbury, Ontario, respectively.

CNSC staff is recommending that the Commission approve the inclusion of the Greyhawk and Agnew Lake closed mines on the existing list of mines exempted from the *Nuclear Safety and Control Act* (NSCA) requirement for a licence to possess, manage and store nuclear substances.

The Commission has determined that a public hearing is not necessary to consider CNSC staff's request in this case. The hearing will be conducted by way of a written submission from CNSC staff.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

CNSC staff's recommendations are not available on-line and must be requested through the Secretariat at the address below:

c/o Julie Bouchard
