Ref. 2012-H-107

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in May to consider an application by Ontario Power Generation Inc. (OPG) to amend the Nuclear Power Reactor Operating Licence for the Pickering B Nuclear Generating Station within the municipality of Pickering, Ontario.

OPG has requested to amend the current Pickering NGS operating licence to adopt the new licence format structure with a licence conditions handbook. This amendment is considered administrative in nature and will result in no changes to the operation, the processes and organization or any of the other programs currently in effect at the licensed facility.

The Commission will consider OPG's application by way of written submissions, in a closed session. CNSC staff recommendation and OPG's submission will be available as of April 24, 2012 by contacting the Secretariat at the address below.

The public is invited to comment, in writing, on OPG's application. Requests to intervene must be filed with the Secretary of the Commission by May 24, 2012 directly on-line at <http://www.nuclearsafety.gc.ca/eng/commission/intervention/index.cfm> or at the address below. Personal information, such as address and telephone numbers, is essential for linking the submission to its author. Please submit your personal information on a separate page if you wish to ensure its confidentiality. It should be noted that all submissions are available to the public upon request to the Secretariat.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.
