# Summary Record of Proceedings and Decision

In the Matter of

Applicant Cameco Corporation

Subject Application to Renew the Uranium Mine Licence  
for the McArthur River Operation

Public Hearing  
Date October 1, 2 and 3, 2013

**SUMMARY RECORD OF PROCEEDINGS**

Applicant: Cameco Corporation

Address/Location: 2121 – 11<sup>th</sup> Street West, Saskatoon, Saskatchewan S7M 1J3

Purpose: Application to renew the Uranium Mine Licence for the McArthur River Operation.

Application received: December 21 and 31, 2012

Date of public hearing: October 1, 2 and 3, 2013

Location: Kikinahk Friendship Centre,  
320 Boardman Street, La Ronge, Saskatchewan

Members present: M. Binder, Chair  
R. Velshi S. McEwan  
R. J. Barriault M. J. McDill  
A. Harvey D.D. Tolgyesi

Secretary: M.A. Leblanc  
Recording Secretary: B. Gerestein  
Senior General Counsel: J. Lavoie

<b>Introduction</b> .....	1
<b>Decision</b> .....	2
<b>Issues and Commission Findings</b> .....	3
<b>Appendix A – Intervenors</b> .....	A

## Introduction

1. Cameco Corporation (Cameco) has applied to the Canadian Nuclear Safety Commission<sup>1</sup> for the renewal of the Uranium Mine Licence for its McArthur River Operation located in northern Saskatchewan. The current operating licence, UMOL-MINE-MCARTHUR.02/2013, expires on October 31, 2013. Cameco requested a renewal of the licence for a period of 10 years.
2. Cameco is currently authorized to:
  - a) operate a nuclear facility comprised of an underground mine, an underground ore-processing facility, a surface ore load-out facility, a waste management system, and associated site facilities;
  - b) mine and process ore and mineralized waste from the facility; and
  - c) possess, store, transfer, import, use, and dispose of nuclear substances and radiation devices that are required for, or associated with laboratory studies and fixed gauge usage.
3. Cameco discovered the McArthur River ore body in 1988. In 1997, the Joint Federal/Provincial Panel on Uranium Mining in Northern Saskatchewan filed its recommendation, which included support for development of the McArthur River deposit. The Atomic Energy Control Board (AECB), the predecessor of the Canadian Nuclear Safety Commission (CNSC), issued regulatory approval to construct the underground and surface facilities in 1997 and 1998. The AECB issued a licence in 1999 to allow production mining. Mining has been ongoing at McArthur River since 1999.
4. Cameco has applied to the CNSC for a licence renewal for a 10-year period to mine and process ore from the facility. The licence would allow Cameco to continue to mine the underground ore reserves, operate the ore handling, storage and transportation systems, and manage the associated waste rock facilities.

## Issues

5. In considering the application, the Commission was required to decide, pursuant to subsection 24(4) of the *Nuclear Safety and Control Act*<sup>2</sup> (NSCA):
  - a) if Cameco is qualified to carry on the activity that the licence would authorize; and
  - b) if, in carrying on that activity, Cameco would make adequate provision for the protection of the environment, the health and safety of persons and the

---

<sup>1</sup> The *Canadian Nuclear Safety Commission* is referred to as the “CNSC” when referring to the organization and its staff in general, and as the “Commission” when referring to the tribunal component.

<sup>2</sup> Statutes of Canada (S.C.) 1997, chapter (c.) 9.

maintenance of national security and measures required to implement international obligations to which Canada has agreed.

### Public Hearing

6. The Commission, in making its decision, considered information presented for a public hearing held on October 1, 2 and 3, 2013 in La Ronge, Saskatchewan. The public hearing was conducted in accordance with the *Canadian Nuclear Safety Commission Rules of Procedure*<sup>3</sup>. During the public hearing, the Commission considered written submissions and heard oral presentations from CNSC staff (CMD 13-H14) and Cameco (CMD 13-H14.1). The Commission also considered oral and written submissions from 25 intervenors (see Appendix A for a detailed list of interventions).

### **Decision**

7. Based on its consideration of the matter, the Commission concludes that Cameco is qualified to carry on the activity that the renewed licence will authorize. The Commission is also satisfied that Cameco, in carrying on that activity, will make adequate provision for the protection of the environment, the health and safety of persons and the maintenance of national security and measures required to implement international obligations to which Canada has agreed. Therefore,

the Commission, pursuant to section 24 of the *Nuclear Safety and Control Act*, renews the Uranium Mine Licence issued to Cameco Corporation for its McArthur River Operation located in northern Saskatchewan. The renewed licence, UMOL-MINE-MCARTHUR.00/2023, is valid from November 1, 2013 until October 31, 2023, unless suspended, amended, revoked or replaced.

8. The Commission includes in the licence the conditions as recommended by CNSC staff in CMD 13-H14.
9. With this decision, the Commission directs CNSC staff to provide annual reports on the performance of the McArthur River Operation, as part of the CNSC's Annual Report on Nuclear Fuel Cycle Facilities in Canada. CNSC staff shall present these reports at public proceedings of the Commission. A special focus on the environmental performance of the McArthur River Operation, with emphasis on releases to air, water and soil is expected to be part of the annual reports. Some of the proceedings may be held in Saskatchewan with public participation.
10. The Commission also accepts the revised financial guarantee for decommissioning of the McArthur River Operation.

---

<sup>3</sup> Statutory Orders and Regulations (SOR)/2000-211.

11. The Commission requests that Cameco prepare timeline estimates for completion of each of the major reclamation and decommissioning activities planned at the McArthur River Operation. Updates of the remediation and decommissioning plans and timelines will be presented as part of the aforementioned annual reports by CNSC staff on the performance of the McArthur River Operation.
12. The Commission accepts CNSC staff's recommendation regarding the delegation of authority in the Licence Conditions Handbook (LCH). The Commission notes that CNSC staff can bring any matter to the Commission as applicable. The Commission directs CNSC staff to inform the Commission on an annual basis of any changes made to the LCH.

### **Issues and Commission Findings**

13. In making its licensing decision, the Commission considered a number of issues relating to Cameco's qualification to carry out the proposed activities and the adequacy of the proposed measures for protecting the environment, the health and safety of persons, national security and international obligations to which Canada has agreed.
14. The Commission determined that there was no requirement for an Environmental Assessment pursuant to subsection 5(1) of the *Canadian Environmental Assessment Act, 2012*<sup>4</sup> (CEAA). The Commission is satisfied that all applicable requirements of the CEAA have been fulfilled.
15. The Commission notes that the NSCA provides a strong regulatory framework for environmental protection. Whether an EA is required or not, the CNSC regulatory system ensures that adequate measures are in place to protect the environment and human health in accordance with the NSCA and its Regulations.
16. The findings of the Commission will be presented in a detailed *Record of Proceedings, including Reasons for Decision*, to be published at a later date.
