

Notice of Hearing

November 15, 2013

Ref. 2013-H-104

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in November 2013 to consider the request from New Brunswick Power Corporation (NB Power) to modify the used fuel and waste management funds investment strategy for the Point Lepreau Nuclear Generating Station. The facility is located on the Lepreau Peninsula, 40 km southwest of Saint John, New Brunswick.

The Commission has determined that a public hearing is not necessary to consider this request from NB Power. The hearing will be conducted by way of written submissions from CNSC staff and NB Power.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

The hearing submissions are not available online and must be requested through the Secretariat at the address below:
