

Notice of Hearing

December 18, 2014

Ref. 2014-H-111

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing in December 2014 to consider applications from New Brunswick Power Corporation, Bruce Power and Ontario Power Generation to amend their respective power reactor operating licences.

The licensees are requesting an administrative licence amendment to replace S-99, *Reporting Requirements for Operating Nuclear Power Plants* with REGDOC-3.1.1, *Reporting Requirements of Nuclear Power Plants*.

The Commission has determined that a public hearing is not necessary to consider these requests as they do not raise matters related to health, safety or environmental protection that would warrant being considered in the context of a public hearing. The hearing will be conducted by way of written submissions from CNSC staff and the applicants.

Following the deliberations in a closed session and decision of the Commission on this matter, a record of proceedings, including reasons for decision will be published on the CNSC website and made available to the public.

The hearing submissions are not available on the CNSC website and must be requested through the Secretariat at the address below:
