Subject:

EXTERNAL EMAIL – USE CAUTION / COURRIEL EXTERNE – FAITES PREUVE DE PRUDENCE

- I am very concerned about the about the long-term burden of nuclear waste, including current proposals by the nuclear industry to transport, process, bury and abandon all of Canada's high-level nuclear waste in a single location
- I am very concerned about nuclear cost overruns and impacts on electricity rates
- I am very concerned about climate change and the delays in real climate action brought about when utilities and governments are distracted by nuclear greenwashing

While these concerns will fall on deaf ears hopefully we will see a new government not captured by the nuclear industry and willing to protect the citizens from this corrupt industry.
