Subject: My cancer and nuclear power

Categories:

EXTERNAL EMAIL – USE CAUTION / COURRIEL EXTERNE – FAITES PREUVE DE PRUDENCE

To whom it may concern,

I am dying of a cancer that was likely borne of my having drunk milk from cows permitted to graze on grass on acreage around the Three Mile Island nuclear facility in the 70s. Nuclear energy is not worth the price. You can find as lucrative solutions with alternative energies, if only you would have the humanity and the will to invest in them.
