EXTERNAL EMAIL – USE CAUTION / COURRIEL EXTERNE – FAITES PREUVE DE PRUDENCE

---

Thank you for this opportunity to address my concerns.

I am extremely concerned about climate change and I note the extraordinary upheavals of land. The ever-increasing instability of our land forms highlights the risk of trying to store nuclear waste or even of operating nuclear stations. The war in Ukraine too brought this home with the threats of destruction due to military strikes on or around the nuclear facility.

When you can produce cheaper wind and solar and use storage, why would you take such a risk?

Who knows what lies ahead? I can only respectfully ask what are you thinking?

Please consider my thoughts. We are all in this together.

Sincerely,

Johanna Aucoin-Slaunwhite
