Re: Bruce Power 10-Year Operating Licence Renewal

On behalf of JNE Consulting Ltd., please accept this letter of support for Bruce Power in their application for a 10-Year Operating Licence Renewal.

JNE is a full-service multi-disciplinary design engineering and project services firm located in Hamilton, serving a wide range of industries and currently expanding into the Canadian nuclear industry. JNE has several professional project services staff located at the Bruce Power site in Tiverton, Ontario, supporting Bruce Power in Project Management, Project Planning, and Continuous Improvement. In addition to these staff directly supporting Bruce Power in Tiverton, JNE employs over 100 engineering and project professionals at our head office location in Hamilton, many of whom are newcomers to Ontario.

According to Bruce Power, as it renews its fleet of low-cost, clean and innovative power generation facilities over the next 20 years, the annual economic impacts for the province of Ontario include;

- Over 5,000 direct and indirect jobs,
- \$960 million to \$1.2 billion in labour income, and
- \$735 million to \$1.05 billion through spending on equipment, supplies and material, both directly and indirectly.

Over the past several years, JNE has invested significant time and resources in developing our own nuclear quality management systems to comply with stringent requirements of Bruce Power and the CNSC, and foster a safety culture where employee and public safety are the priority. Approval of Bruce Power's 10-Year Licence renewal would further JNE's planned investments in people, systems and infrastructure in both the Hamilton and Grey-Bruce areas, further benefiting those local communities.

"The Bruce Power MCR project will extend the life of the Bruce Power site by approximately 30 to 35 years ensuring employment for the existing workforce, and MCR activities will also provide jobs for approximately 1,300 people, including both local and Indigenous people. The will result in a sustainable contribution to the local economy, as well as wider socio-economic benefits."
– Bruce Power, Getting the facts on Bruce Power's Impact on the Economy.

Bruce Power's efforts to enhance regional training and employment opportunities for Indigenous communities, which align with the nuclear sector's long-term needs, are commended by JNE. Our corporate values of integrity, respect, diversity, and reliability are aligned with these efforts. As well, JNE is an active member of the Canadian Aboriginal and Minority Supplier Council (CAMSC) and National Minority Supplier Development Council (NMSDC). JNE is looking at Aboriginal engagement as a part of our planned expansion into the Bruce county area. We look to ensure that we are engaging a diverse network of partners as we expand to meet the needs of Bruce Power.

If you require further information about JNE Consulting Ltd., please do not hesitate to contact me.

Sincerely,
