**Audience publique de la Commission –  
Partie 2**

**28-31 mai 2018**

# Bruce Power 10-year Licence Renewal

# WiN-Canada

Women in Nuclear Canada, established in 2004, represents over 1,700 women and men across Canada and nearly 1,000 of them reside in Ontario. WiN-Canada's goals include:

1. To open a dialogue with the public and in particular with other women on the contribution that nuclear technologies make to people and society.
2. To facilitate the exchange of knowledge and experience among our members.
3. To promote and support an interest in nuclear-related careers especially among women and young people.

# WiN-Bruce

Many members of WiN-Bruce are employed by Bruce Power and Bruce Power is very supportive of our chapter. Other members work for OPG, many other nuclear related companies and in the medical community. Obviously, many of our members would be directly affected by the outcome of the Bruce Power licence renewal application.

WiN-Bruce currently has close to 400 members.

# Who are we?

WiN-Canada members come from a variety of work experiences and education. We are involved at every level of the organization, from operations to regulatory affairs, radiation technicians, welders and senior leadership.

# Review of CMD 18-H4

All fourteen Safety and Control Areas were reviewed in WiN-Canada's written submission provided. WiN-Canada is particularly happy with the strong safety culture demonstrated in Human Performance Management, pleased with the Fully Satisfactory rating from the CNSC in Radiation Protection and supports the assessment that Bruce Power has robust Emergency Management post-Fukushima.

# Aboriginal Consultation

- WiN-Canada recognizes that the Bruce Power site lies within the traditional territory of the Saugeen Ojibway Nation.
- WiN-Canada members are interested and supportive of Indigenous rights and collaboration and are pleased with Bruce Power's engagement with local communities.

# Socio-Economic Impact

- WiN-Canada would like to see our community's young people, especially Indigenous young people remain in the area for employment. We look forward to Bruce Power providing opportunities for skilled employment of women working in the field of nuclear science and technology as well as skilled trades.

# Conclusion

- Due to our day to day interaction with the nuclear industry and our strong belief in the expertise of Bruce Power's employees and their proven history of safe operation, WiN-Canada supports the Application for Licence Renewal Bruce Power Inc.-Bruce A and Bruce B Nuclear Generating Stations.
