Added value from presentation: I have been involved with An Ajax environmental group for 30 years. Also spent time with DNA. I have lived in Ajax and Pickering for 35 years. I have close friends living and attending schools in the area closest to the Pickering Nuclear station. I believe that the ordinary lay local resident needs to be heard.

The population in South Pickering has unwisely grown. The safety of the local residents is in peril. Even if a small accident were to happen and residents needed to be evacuated It will be impossible. Liverpool Rd.,Sandy beach rd.,Westshore will be blocked with traffic attempting to evacuate. No amount of planning can make that work. Consider the 2 schools and the precious lives in that area no other country would have a nuclear st. so close to dense population.

Its time to take this time to move into more sustainable energy. We still have the Darlington station.
