Douglas Point Decommissioning Licence Amendment Hearing

November 25 & 26, 2020

INTRODUCTION

Municipality of Kincardine:

Anne Eadie, Mayor

INTRODUCTION

The Municipality of Kincardine is a strong supporter of the nuclear industry as the host of the Bruce Power reactors and the Ontario Power Generation's Western Waste Management Facility (WWMF). We are also the host municipality for the former Douglas Point reactor.

THE MUNICIPALITY'S POSITION ON THE DECOMMISSIONING

Council of the Municipality of Kincardine has approved an intervention in the hearing proceedings and supports the decommissioning of the Douglas Point reactor. Canadian Nuclear Laboratories (CNL) attended Council on February 3, 2020, to provide an overview of the decommissioning project and has subsequently been working with Municipal staff to provide specific information about the decommissioning waste.

NON-NUCLEAR WASTE DISPOSAL

- As CNL staff develop a plan for the decommissioning, they have been engaging in discussion with members of staff. CNL staff have provided waste projections as a result of the decommissioning and have further discussed the management of these materials over the next decade if the licence amendment is approved.
- CNL representatives have shared analysis from recent projects and emphasized a priority on reusing viable materials and properly disposing of contaminated materials.

NON-NUCLEAR WASTE DISPOSAL

- Of the approximate projected total of 120,000 metric tonnes of waste, approximately 100 tonnes of safe construction waste will be landfilled in the first half of the project, with 15 tonnes being landfilled in the second half.
- Most of the waste will be repurposed or diverted out of the community, including hazardous materials.

NON-NUCLEAR WASTE DISPOSAL

The Municipality of Kincardine is confident that CNL will continue to work with the Municipality to determine acceptable volumes of clean waste to be accepted at our landfill sites and appropriate compensation for waste disposal. CNL will be attending the Council meeting on November 2, 2020, to provide an update regarding the project and decommission waste projections.

CONCLUSION

The Municipality of Kincardine is satisfied with CNL's decommissioning plans and supports the approval of a licence amendment for active decommissioning.
