Subject Cancer Care Manitoba EIR: Response to Commission member request for details of dose
Objet calculation

During the September 16, 2020 Commission meeting, CNSC staff presented an Event Initial Response (EIR) report. The report was prompted by a radiation exposure of a Cancer Care Manitoba worker in excess of the regulatory limits per the *Radiation Protection Regulations*. Staff presented the likely cause of the exposure, the licensee’s calculation of the dose attributed to a non-occupational activity and CNSC staff assessment of the licensee’s calculation.

The Commission requested details of the dose calculation and the subsequent staff assessment.

This memo and associated references provides the information requested by the Commission during the September 16 Commission meeting.

Staff are available to provide further information upon request.
