Re: Cameco License Renewal

As Port Hope's trusted Voice of Business, the Chamber is focused on building a vibrant community where businesses thrive. We influence public policy and work with partners to remain focused on advocacy, education, relationship building and resource development that empowers the business sector.

The Chamber believes that we are very fortunate to have Cameco in this community and appreciates that Cameco is one of the largest employers. The contributions they make to supporting the economic viability of the community by encouraging workforce in the region, and by being an employer that takes care of its employees while valuing safety and environmental protection, quality, and accountability are immeasurable. This community needs Cameco to continue to operate with a solid foundation for economic development.

We can also speak to the fact that Cameco is a strong supporter of the community. Be it through Mental Health supports, community sponsorship, participation in events and/or through their continuous updates related to safety and compliance, Cameco is community partner we value and appreciate.

Port Hope and District Chamber of Commerce fully supports the 20-year license renewal application that has been submitted for Cameco Fuel Manufacturing. We are supportive of Cameco and look forward to the positive impacts, innovative supports and on-going safety considerations they will continue to offer to the community and the Chamber.
