Subject: No 25 year nuclear licence!

Hello,

I am a member of the public concerned about nuclear and how climate change may impact the facility. I think at this juncture in human history we have established nuclear is not a safe option, it's not a climate solution, and it does not improve domestic security. Nuclear puts us at higher risk, an humanity is ALREADY facing numerous almost insurmountable crisis.

It is especially important to protect the Bay of Fundy ecosystems as we face a climate crisis and ecological collapse.

It's time to work toward closing this facility, and putting all our efforts and resources to RAPIDLY transitioning away from carbon and nuclear energy.

Sincerely,

Heather Reed
