**Subject:** Nuclear power plant being considered in bay of Fundy.

Please find better solutions to nuclear power. Use wind turbines, waterways and safer alternatives to provide the energy we require. We should stop investing in things open to the elements that cannot be disposed of safely and that present risks for vandalism by others wishing to do harm. Not to mention the destruction mother nature delivers and will continue to deliver. We will never control the wind and waves and erosion or prevent earthquakes or other unforeseen calamities. Save our planet instead with wiser, safer alternatives, so our children can one day enjoy their futures as well.
