Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a parent concerned about the future of my children and leaving them with legacy radioactive waste. I am a young person whose future will be directly impacted by choosing nuclear over renewables.

The Bay of Fundy is one of the natural wonders of North America. We already know that the Lepreau nuclear plant is killing fish in the Bay due to entrainment from the water intake. A 25-year licence period may decrease the amount of regular assessments of the decline in marine health.

Our natural resources here are already being depleted here in NB by other companies. We do not need more of this damage done. Nuclear waste is no joke and the future needs to be thought of.

please acknowledge receipt of this email.  
Goodbye.

Sincerely,

Raven Cameron
