Dear Officer:

My name is Tina Dealy, and I am the local chair person representative for the Local Service District (LSD) on the Fundy Regional Service Commission. I am writing in support of a 25-year licence renewal for New Brunswick Power's Point Lepreau Nuclear Generating Station (PLNGS).

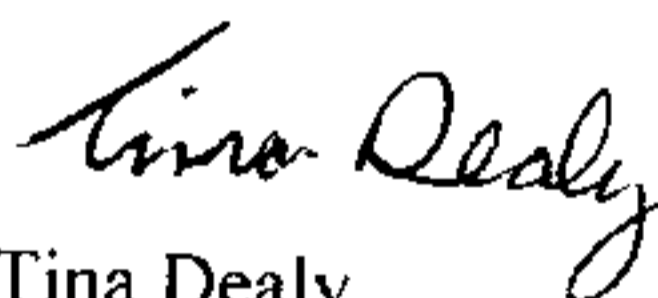

For Commissioners unfamiliar with the LSD model, the Minister provides residents of the Province's unincorporated areas with a variety of services such as fire protection, solid waste collection and disposal, and recreation center. The minister also provides for dog control services in unincorporated areas.

I had in my capacity with the LSD, and as a resident, to interact with PLNGS staff on a regular basis and I feel that the staff at the Station is committed to operating the plant safely.

I know that the people of PLNGS share my values in their interactions with the community where they provide a strong foundational presence on many of our community initiatives. The plant is diligent in ensuring communications related to Station activities including open houses, shutdown and plant operational updates is shared with its surrounding communities. As well, there is a two-way dialogue about what is happening at the plant and on any concerns or questions residents and local business people may have about operations at the station – if we have a question, we know who to call.

Point Lepreau Nuclear Generating Station is an important part of our community contributing to many aspects of quality of life in the Bay area. In conclusion, We fully support the renewal of its twenty five-year licence.

Sincerely,

Tina Dealy  
Local Service District Chair Person
