Intervention PLNGS Hearing Ref. 2022-H-02

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the license renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a parent concerned about the future of my children and leaving them with legacy radioactive waste, radioactive emissions in the event of an accident. Also a member of the public concerned about nuclear and how climate change may impact the facility.

With the state of deuteriation of our societies morels, values, work ethic, education, and general interest in anything outside of their our feelings, wants, and desires; this can only progressively leave chances for inadequacy of emergency planning, awareness and personnel in all levels of emergency response.

Thank you for your time

Noelle Mitton
