Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the licence renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a young person whose future will be directly impacted by choosing nuclear over renewables. I suffer from severe anxiety and depression, I would have to leave my home and relocate due to valid concerns about mine and my family's health if a 25 year license were to be issued. I am a parent concerned about the future of my children and leaving them with legacy radioactive waste. I am also concerned about radioactive emissions in the event of an accident. Please don't take away my peace of mind that I've just newly found. We cannot afford to relocate if you go ahead with the current plan, and I fear what it would do to my family. Please reconsider.
