Subject: Point LePreau lease application

Canadian Nuclear Safety Commission,

My name is Linda Dornan and I am very concerned about our NB government giving Point LePreau Nuclear Power Station a 25 year license renewal. That would leave my grandchildren no say in their present life or most of their futures, or of their future children.

There are continuing concerns about the legacy of radioactive waste and radioactive emissions in the event of an accident. By controlling the license length, regular reassessment of LePreau's viability is possible. A five year lease, as it has been, remains preferable.

With continuing climate changes and how this might impact on the Point LePreau facility itself, and the possibility of alternative energy sources replacing the plant's output, a long term lease leaves little room for alternatives more acceptable to our community to be accepted, and maintains the ongoing fear of accidents and the effects of radioactive waste. A long lease does not provide community security but exasperates fear.

Please acknowledge receipt of this email,
with respect,

Linda Dornan

Sackville, NB
