Subject: No 25 year deal!!!

To the People's responsible for making this decisions,

Please do not extend the nuclear power plants deal for 25 years!! It would take away their accountability and remove the voice of young people for most of their life to choose otherwise. Renewable energy is the way of the future, but even if you don't believe that, there are a lot of things to be considered with nuclear power and the right to choose should remain in place for a 5-year interval. There are a lot of other issues to consider as well including reconciliation.

Changing their deal from 5 years to 25 years would really be giving them the upper hand in all things and I plead with you to reconsider. Thank you!
