Subject: Intervention PLNGS Hearing Ref. 2022-H-02

Greetings,

Please consider this email my written intervention to the Canadian Nuclear Safety Commission, regarding the license renewal of the NB Power Point Lepreau Nuclear Generating Station.

I am a member of the public who believes that 25 years is a ludicrously lengthy amount of time to seek as a relicensing extension. Future power generation options can potentially be more viable and a license to use what may be seen as a comparatively dangerous technology that far into the future is not advisable. I see no reason as to why a 5 year extension is not sufficient.

Sincerely,

Craig Robinson
