April 11, 2022

Dear Secretariat:

I would like to submit a written intervention for the public meeting on May 31, 2022, which will consider Canadian Nuclear Laboratories' application to amend its Chalk River Laboratories site licence to authorize the construction of a near surface disposal facility.

My name is Cameron Dewar and I am the President of Dewar Industrial Services Inc. we have a long history supporting the Nuclear Industry in Ontario.

I am writing in support of the NSDF Project at Chalk River Laboratories as this project is based on sound engineering and will provide the best storage of existing materials to ensure the protection of the environment for the long term. This project will also allow CNL to continue with their site revitalization plans allowing for the continuation of ground-breaking science and technology while adding to the economy through construction activities and in the future by expanding the Chalk River Site to build on their life-saving research and nuclear technology capacities.

This project is the right thing to do for the environment, the community and for the future of the CNL Chalk River Site.

Thank you for providing the opportunity to intervene in this matter,

Cameron Dewar | President | **Dewar Industrial Services Inc**
