March 11, 2022

Dear Ms. Velshi,

Re: Application by SRB Technologies (Canada) Inc. to renew, for a period of 15 years, its nuclear substance processing facility operating licence for its operation in Pembroke, Ontario.

It is my pleasure, as the Member of Parliament representing the people of Renfrew-Nipissing-Pembroke, to **support** SRB Technologies to renew its facility operating licence for 15 years. I am very familiar with its operation, having represented the area for 22 of the 32 years this business has been in operation.

As a respected member of our local business community for over 30 years, SRBT provides good, secure, local employment. By granting a 15 year licence, this provides SRBT with stability that benefits its employees as well as future planning for the business. SRBT continues to be a local success story.

I am pleased to note the CNSC staff recommendation is to support the request by SRBT to renew its operating licence for 15 years. This recommendation is in keeping with the need for fact-based decision making, particularly in this case where the science clearly supports the CNSC staff recommendation.

The SRBT business model has been recognized by the Federal Government through the Federally funded Renfrew County Community Futures Development Corporation.

As the local Member of Parliament, I can confirm that during the current operation of SRBT, I have received zero expressions of concern regarding the operation of SRBT in Pembroke.

In closing, I am pleased to support the renewal of SRBT's nuclear substance processing facility operating licence, and to support the CNSC staff recommendation to grant this licence for a 15 year period.

Yours Truly,

Cheryl Gallant, MP
