Re: Intervention to Proposed Operating License Renewal for SRB Technologies Inc. (Canada)

We, the Renfrew County Regional Science Fair, are writing to intervene in the proposed renewal for SRB Technologies' Operating License. As a long-time community partner with SRB, we strongly support the renewal of the operating license for the Pembroke facility and the continuation of an important Pembroke institution that has been a pillar of the community.

We have had the good fortune to work with SRB Technologies for years, and they have supported our regional science fair and other local STEM activities, such as school science fairs. Without SRB, we would not have the resources to assist schools and Renfrew County students' STEM education through the science fair and other activities for local high school and elementary school students.

SRB has proven itself to be an important facet of the local community, supporting important initiatives such as their push to create face shields for local hospitals and health care workers early in the COVID-19 pandemic.

Having had representatives from SRB come to our science fair every year to present awards and talk to students, we have always been impressed by their openness and honesty in sharing the great products that they produce in their facility.

We also feel that a 15-year license renewal will give SRB the stability it needs to continue to meet its regulatory commitments and ensure that it is a positive influence on the local community for years to come. To us, a strong SRB Technologies is essential to the local community.

As such, the Renfrew County Regional Science Fair is proud to support the 15-year license renewal for SRB Technologies. Please do not hesitate to contact us with any questions.

Shawna Miller
Board Member, Renfrew County Regional Science Fair
