Re: Bruce Power Mid-Term Update on Licensed Activities at the Bruce Nuclear Site

Dear Commissioners,

Nuclear Promise X (NPX) would like to express our support for Bruce Power during their mid-term license review. Bruce Power is an asset to our local community, our province, and our country.

We are a nuclear services provider with offices in Kincardine and Whitby, Ontario. Bruce Power was our first client, and we continue to work closely with Bruce Power in areas including project management, digital innovation and product development, design engineering and mega-project innovation.

Being a partner to Bruce Power has allowed us to grow from a 4-person start-up established in 2018 to a nearly 200-person strong supplier working with every Canadian nuclear utility. Bruce Power has also offered our employees the opportunity to grow into the next generation of nuclear industry leaders.

Our company has seen first-hand Bruce Power's unwavering commitment to safety, innovation and supporting our local communities in Bruce, Grey and Huron counties. In particular, I want to highlight Bruce Power's support for hockey hub vaccination clinics across Southwestern Ontario and the GTA.

We fully support Bruce Power's continued safe operations. Bruce Power's contribution to Ontario's clean electricity system, production of life-saving medical isotopes, and pursuit of nuclear industry growth are essential to a cleaner, more prosperous future.

Sincerely,

Bharath Nangia
CEO, Nuclear Promise X
