# Oral Intervention for the Darlington New Nuclear Project

The Regional Municipality of Durham

# Durham Region

# Our support

- There is increased demand for low-carbon electricity such as nuclear
- Durham Region is an informed, experienced and willing host community
- The Region supports the Darlington New Nuclear Project

# Host Community Challenges

- The multi-level governance structure of the nuclear sector presents significant challenges for host communities like Durham Region
- CNSC relies on host communities for information on local impacts, but communities are not adequately equipped to provide this effectively
- The full cost of the nuclear sector is subsidized by Durham Region property taxpayers

## Call to Action:

1. The CNSC should establish MOUs with host municipalities to ensure resources to participate in regulatory processes and regulatory document reviews
2. Mandate a comprehensive review of the financial arrangements between nuclear operators, the province, and host communities as a condition of licencing
3. Identify host community challenges as a priority for ministerial support
