DATE: December 10, 2024

Senior Tribunal Officer:

I would like to provide a written intervention for the upcoming hearing on January 30, 2025, regarding Cameco's application to revoke the current CNSC licence and release the remaining Beaverlodge properties to the provincial Institutional Control Program.

I am a Uranium City community member and local business owner. I have lived in Uranium City for more than 25 years and have been providing contracting services for Cameco since the late 1990's. I have worked very closely over the years with Cameco to complete various remediation projects like the Zora Creek Flow Path reconstruction, installation of stainless-steel shaft caps, crown pillar remediation, site clean-up and much more. As such, I am very familiar with the decommissioned Beaverlodge properties and Cameco's commitment to the safety of people and protection of the environment. Based on my experience, Cameco responds to concerns and values local knowledge and incorporates it into their decision-making process for remediation activities.

Over the years I have seen Cameco's actions and management practices associated with the decommissioned Beaverlodge properties. I am in support of Cameco's request because I am confident they have successfully met their performance objectives and the properties pose minimal risk to people practicing traditional activities.

Thank you for providing the opportunity to intervene in this matter,

Kevin Lewandoski
