Re: *Public Meeting February 25, 2025 -- Regulatory Oversight Report on the Canadian Nuclear Power Generating Sites for 2023*

I am pleased to provide this letter of support acknowledging Bruce Power's ongoing commitment to meet the Canadian Nuclear Safety Commission's regulatory requirements. Bruce Power's unwavering commitment to safety, community welfare, and environmental stewardship stands as a remarkable example of responsible corporate citizenship.

Bruce Power plays a critical role in ensuring clean energy for future generations, and we are proud to collaborate in achieving Canada's net zero goals. The economic impact has been transformative – with over 60 nuclear suppliers contributing to our community and investing \$2 million annually, in partnership with their supply chain network, through various non-profit and community-based programs.

We are enthusiastic about Bruce Power's current efforts to expand nuclear generation through the Bruce C Nuclear Project. The Town of Saugeen Shores recognizes the importance of advancing clean, reliable, and affordable nuclear power, reflected by the pre-development work at Bruce Power, as a part of Ontario's Affordable Energy Future. Additionally, the Town recognizes the significant economic opportunities this proposed expansion represents and we look forward to the continued collaborative efforts with Bruce Power throughout the Impact Assessment process.

On behalf of Council, we are proud to have Bruce Power in our community and look forward to a continuing partnership for years to come.

Sincerely,

Luke Charbonneau, Mayor
Town of Saugeen Shores
