## *Notice of Hearing in Writing*

---

January 26, 2026

Ref. 2026-H-108

### **CNSC to conduct a hearing in writing on Ontario Power Generation's application to amend its licences to reflect a change in address**

The Canadian Nuclear Safety Commission (CNSC) will conduct a public hearing based on written submissions in early 2026 to consider an administrative licence amendment [application](#) from Ontario Power Generation (OPG). OPG has applied for an amendment to its licences for the following facilities to reflect the change in address of its corporate headquarters:

- Darlington New Nuclear Project (licences to prepare site and construct)
- Pickering Nuclear Generating Station
- Darlington Nuclear Generating Station
- Western Waste Management Facility
- Pickering Waste Management Facility
- Darlington Waste Management Facility

OPG's facilities are located on different sites in Ontario and in the traditional and treaty territories of many Indigenous Nations and communities.

Pursuant to rule 3 of the [Canadian Nuclear Safety Commission Rules of Procedure](#) (the Rules), the Commission has decided to vary the Rules in order to ensure that this hearing is dealt with as informally and expeditiously as the circumstances and the considerations of fairness permit. The Commission will consider written submissions from OPG and from CNSC staff. A panel of the Commission will then deliberate and render a decision on this matter. A decision from the Commission is anticipated in **early 2026**. A record of decision will be published on the [CNSC website](#) and made available on request to the Commission Registry.

Submissions from OPG and CNSC staff are available on the [CNSC website](#) or on request to the Commission Registry.

**For further information on the public Commission hearing process, or on the licensee or the facilities being considered in this matter, or to request documents, contact:**

Tribunal Officer, Commission Registry
