Re: Cameco's licence renewal application for the Port Hope Conversion Facility (Nov 3-5, 2026 Hearing)

Dear President and Commission Members,

Hello, my name is Nate Hladysh and I am currently employed as a janitor at Cameco's Port Hope Conversion Facility. I have been employed here for two years and this job has provided my family and I with financial stability and prosperity. My relationship with Cameco has been a positive one from the very beginning. Since my hiring, I have always felt welcomed, valued and an important member of the team. Cameco puts their employees' health and safety above all else. Through training, CIRS reporting, PPE and open dialogue, Cameco has always made it a priority to see their employees do their jobs safely. I believe Cameco deserves to have the 20-year CNSC Licence Renewal granted because of their dedication to safety on site and their generosity in the community. Cameco strives to ensure strict safety and environmental practices so that community members and their families can live comfortably and peacefully with no risk of contamination on their property or on their person. Cameco has been committed to community engagement by announcing their intentions that may affect the public. The Port Hope Conversion Facility should be granted a 20-year licence renewal in my opinion because Cameco checks all the necessary boxes. Cameco has the highest standards for health and safety of their employees while balancing strong performance with its shareholders. Cameco does this while also considering public interest and a greener future for everyone. It brings me great joy knowing that my children will grow up in a world powered by secure, low-carbon energy.

Sincerely,
Nate Hladysh
