Re: Cameco's licence renewal application for the Port Hope Conversion Facility (Nov 3-5, 2026 Hearing)

Dear President and Commission Members,

My name is Paula Moore, and I am a Training Specialist II at Cameco's Port Hope Conversion Facility (PHCF).

Through my role, I work closely with employees and subject matter experts to support training programs that promote safe, compliant, and effective work practices.

Cameco is a respected leader in the nuclear industry and a valued member of the Port Hope community. The Port Hope Conversion Facility plays an important role in supporting the nuclear fuel cycle while maintaining a strong commitment to safety and environmental stewardship.

I support Cameco's application for renewal of the PHCF operating licence and recognize the importance of a stable regulatory framework that supports long-term planning and operational excellence.

Based on my experience at PHCF, Cameco has demonstrated a sustained commitment to protecting the health and safety of workers, the public, and the environment through strong programs, procedures, and continuous improvement initiatives.

Cameco also maintains a commitment to open communication and meaningful engagement with employees, Indigenous communities, local residents, and other stakeholders, fostering transparency and trust.

Given Cameco's strong performance, demonstrated commitment to safety and environmental protection, and positive contributions to the community, I believe the Port Hope Conversion Facility should be granted a 20-year licence renewal.

Sincerely,

Paula Moore
