Re: Cameco's license renewal application for the Port Hope Conversion Facility (Nov 3-5, 2026 Hearing)

Dear President and Commission Members,

My name is Khaled Jawhar, and I am a Project Manager with Cameco at the Port Hope Conversion Facility (PHCF).

I have had the opportunity to work closely with many teams across the facility, supporting projects that enhance safety, reliability, and operational performance. This experience has given me direct insight into Cameco's culture and values.

Cameco is a global leader in the nuclear fuel industry and plays an important role in supporting clean energy production worldwide. The company is recognized for operating responsibly and maintaining high standards in safety, environmental protection, and community engagement.

Port Hope Conversion Facility (PHCF) plays an essential role in the nuclear fuel cycle, helping provide the fuel for safe, reliable, and carbon-free nuclear energy. Renewing its licence supports a secure energy future for our communities and contributes to global climate and energy goals.

Throughout my time with Cameco, I have observed a strong commitment to safety and environmental stewardship. The organization consistently demonstrates a proactive approach to risk management, regulatory compliance, and continuous improvement.

Cameco has built strong relationships with employees, Indigenous communities, residents, and other stakeholders through open communication, transparency, and ongoing engagement. The company actively listens to feedback and works collaboratively to address concerns and share information.

Based on Cameco's demonstrated performance, strong safety culture, environmental responsibility, and positive contribution to the community, I fully support the renewal of the Port Hope Conversion Facility's operating licence for a 20-year term. I have confidence in Cameco's ability to continue operating safely, responsibly, and in the best interests of its workers, the public, and the environment.

Sincerely,
Khaled Jawhar
