My name is Adam Lent and I am the President of the United Steelworkers Local 8562. Our Local represents the Security Guards, Fire Systems Inspectors and the Emergency Response and Emergency Medical Team members who work at Cameco's Conversion Facility in Port Hope, Ontario.

Our members provide 24/7, on-site monitoring of the Facility's Security and Fire Detection systems, administer access control of the property and take pride in ensuring that Cameco is able to meet or exceed all nuclear regulatory requirements. Our Response Team members are trained to handle Fire, Hazmat, Rope Rescue and Medical-related Emergencies in order to protect the people, property and the environment at our facility. The Fire Systems Inspectors in our Local maintain our Facility's Emergency Response and Fire Systems equipment with the goal of preventing emergencies from happening and mitigating those that do occur. We are able to perform this work thanks in part to Cameco's commitment to providing our members with the training and resources needed to keep our employees and community safe.

We are proud of the work we do and the role we play in achieving Cameco's goal of providing the world with safe, clean and reliable energy. Based on our experiences, we are confident that Cameco has demonstrated the commitment and ability to continue to operate a safe and rewarding workplace for decades to come.

On behalf of our members, I would like to express our support of Cameco's application for a 20-year license renewal at the Port Hope Conversion Facility.

Adam Lent

President

USW Local 8562
