Re: Cameco's license renewal application for the Port Hope Conversion Facility(Nov 3-5, 2026 Hearing)

Dear President and Commission Members,

My name is Elizabeth Stewart. As a member of the Friends of the Port Hope Library, our group mandate is to increase awareness and participation in the Library, through marketing and fundraising events.

We have collaborated with the Cameco group in Port Hope on several occasions. The first time we approached Cameco was to request a presentation by Cameco, at the Capitol theatre, to explain the company to the residents of Port Hope. There was a good turnout and appreciative response. Secondly a tour of the facilities was organized for members of the FOL, which further deepened our understanding of the past and future for Cameco.

Given the current trends for energy needs to support communities and new technologies, we realize that Cameco's role as provider of uranium fuel is essential. Nuclear power, whether in the new SMR, or more conventional CANDU reactors, is a necessary component in a reliable, safe energy plan.

We are aware that Cameco has applied for a 20 year license renewal and fully support this. We know Cameco operates under strict safety guidelines.

As a corporate citizen, Cameco has proven to be exemplary. There is good, open communication through newsletters, very supportive of community initiatives, and and as a major employer has an excellent reputation for recognizing employee performance.

Sincerely,
Liz Stewart
