Re: Cameco's licence renewal application for the Port Hope Conversion Facility
(Nov. 3-5, 2026 Hearing)

I am very pleased to write this letter in support of Cameco's renewal application for the Port Hope Facility. Cameco Corporation is one of the largest global providers of the uranium fuel needed to power a safe, secure energy future. The Port Hope Conversion Facility is one of only four uranium conversion facilities in the western world. As an existing Class 1BFuel Facility Operating Licence holder, Cameco's Port Hope Conversion Facility is rigorously regulated by Canada's nuclear regulation the Canadian Nuclear Safety Commission.

My name is Lynda Kay, and I have lived in Cobourg for over 40 years. I have been very active and involved in the local Community both through my work and through volunteering.

For 28 years I was the CEO of the Northumberland United Way, after that for 5 years I was employed by Community Care Northumberland as their Director of Donor Relations and Communications. I have since retired from CCN and enjoy giving back to the community in volunteer capacity.

My community involvement over the years has included being a member of the Board and President of the Port Hope & Chamber of Commerce, Board member for the Cobourg & District Chamber of Commerce, Board Member of the Northumberland Hills Hospital and Current Member and Past President of the Rotary Club of Cobourg, Board Member for the Cobourg & District Sports Hall of Fame, and Board Member for the Northumberland YMCA, Board Member of the Art Gallery of Northumberland and Chair of the Civic Awards for the Town of Cobourg. For the past 10 years I have hosted a local TV Show on Cogeco/Your TV.

Throughout my professional career and my volunteer involvement I have partnered and interacted with Cameco Corporation and their employees. From the day they established themselves in Port Hope they have been a tremendous partner and leader in every aspect of the community. An employer, business partner, supporter of local charities, the arts, sports teams, and health care.

Their leadership, generosity and volunteerism shine throughout the community and they are so appreciated for all that they do and support. Their commitment to safety is outstanding and every year at the annual Day of Caring- they have always lead the safety

talks. Safety is a number one priority at Cameco. The Port Hope Conversion Facility consistently has achieved the highest CNSC rating of Satisfactory in all 14 of the CNSC's Safety and Control Areas.

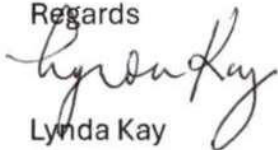

When it comes to communication the Port Hope Conversion Facility has always been a great communicator to the community. Cameco provides presentations, and or onsite tours for the local community, First Nations, and any other groups as requested.

They main a website, social media tools and are always have a major presence at the Port Hope Fair every year.

Through all my years of experience being involved with the community and have had first-hand experience working with Cameco through my various community groups and working relationships I have total trust, and confidence in Cameco. They continue to have a strong community presence, and positive impact on our communities.

I strongly support their application for renewal for their operating licence for a 20-year period.

Regards
