Subject: Cameco Relicensing in Port Hope

EXTERNAL EMAIL – USE CAUTION / COURRIEL EXTERNE – FAITES PREUVE DE PRUDENCE

To the CNSC Board,

I am writing with my concerns over the request by Cameco for a twenty year license.

As a life long resident of urban and rural Port Hope,I have witnessed the damage caused by the former Crown Corporation,Eldorado.

The current cleanup of historic waste from poor past practices, is a nightmare for homeowners,and has gone on for several years, and will continue for several more.

We are still being subjected to daily emissions in our air,soil and water from Cameco, with no proper buffer zone other than the residents that live close to the plant.They are the buffer zone.

There are many concerns around the aging facility on our waterfront and a twenty year license renewal seems an unreasonable request.

Cameco needs to be under a watchful eye and held accountable to the highest standards.

I personally feel Cameco should need to renew their license every five years,then the ten year license they were granted the last time.

Twenty years under the present conditions is too long..

There should have been proper health testing on real residents over the years,not just number crunching and not the expected out comes at different levels of contamination.

The same goes with the cleanup,there should have been health testing of the people before,during and after this is over.

We just keep getting reassurances that all is well in Port Hope.

I do hope the CNSC will think long and hard about concerns raised, and revoke their request for a twenty year license that's being requested, and change to a five year license.

With Regards,
Lori Andrus
