Re: Cameco's Licence Renewal Application for the Port Hope Conversion Facility (November 3–5, 2026 Hearing)

Dear President and Commission Members,

My name is Chief Tim Farquharson, and I am the Chief of Police for the Port Hope Police Service, serving the Municipality of Port Hope and its residents.

As a long-standing community partner, the Port Hope Police Service has worked alongside Cameco and its representatives on matters related to public safety, emergency preparedness, community engagement, and the overall well-being of our community. Through these interactions, we have developed a strong and positive working relationship founded on professionalism, transparency, and mutual respect. Cameco has also been an excellent partner in policing and community safety by providing funding and support for training, equipment, and technology initiatives for the Port Hope Police Service over many years. Their ongoing investment has enhanced our ability to deliver effective policing services and contribute to the safety and security of our community.

Cameco Corporation is one of the world's leading providers of uranium fuel products that support the generation of safe, reliable, carbon-free nuclear energy. The Port Hope Conversion Facility is one of only four uranium conversion facilities in the western world and plays a critical role in supporting Ontario's energy infrastructure and energy security.

Cameco's Port Hope Conversion Facility has applied to the Canadian Nuclear Safety Commission for a 20-year renewal of its operating licence. As a Class 1B Fuel Facility Operating Licence holder, the facility continues to operate under the rigorous oversight of the Canadian Nuclear Safety Commission and remains subject to comprehensive regulatory requirements and ongoing monitoring.

Port Hope Police Service

Safety has consistently been a top priority for Cameco's Port Hope Conversion Facility. The facility has demonstrated a strong commitment to environmental stewardship and regulatory compliance, maintaining radiation exposures well below established limits and controlling environmental emissions at levels that are a fraction of permitted release limits. Their robust monitoring programs and transparent reporting practices reflect a mature and responsible approach to operations.

Cameco has also demonstrated a strong commitment to communication and community engagement. The organization regularly provides information to residents, community organizations, Indigenous communities, and local stakeholders through public meetings, facility tours, presentations, community events, and online communications. Their willingness to engage openly with the community has contributed to a high level of public confidence and trust.

Based on our experience as a community partner, the Port Hope Police Service supports Cameco's application for a 20-year licence renewal. Cameco has demonstrated a consistent commitment to safety, regulatory compliance, transparency, and community engagement. We are confident in their ability to continue operating responsibly while making a positive contribution to the Port Hope community and Canada's energy future.

Thank you for your consideration of this submission.

Sincerely,

Chief Tim Farquharson
