Re: Cameco's licence renewal application for the Port Hope Conversion Facility

Dear President and Commission Members

I have been practicing Occupational Medicine for thirty-eight years. I currently consult with ten companies in Ontario in this field. I have enjoyed consulting at Cameco Conversion Facility and CFM for the last twenty-six years. This includes medical surveillance programs, health and safety programs as well as wellness programs. I meet with every employee to do a wellness visit every one to two years. I meet with Cameco's management team and provide feedback about these programs.

In my opinion, Cameco stands head and shoulders above all others in a comprehensive medical program. The support I receive in advancing initiatives to assist physical and mental health are industry leading. Historically, every employee was given one-to-three-day teaching by Canadian Mental Health. The company has played a leading role in vaccinations. During the COVID outbreak day long drive-through vaccinations were done, not only for Cameco employees, but also for the local citizens.

Cameco has played a leading role historically in the treatment of hydrofluoric acid exposures. I have been sent to attend yearly world meetings on Beryllium, along with nursing staff. Human resources has always had an attitude of wanting to help those in their time of need. The onsite Emergency Response Teams are unparalleled.

I have presented to the CNSC several times in the past. Unfortunately I will be in Calgary at the time of the early November meeting in Port Hope. Overall in twenty-six years I have never had a doubt that I was working for one of Canada's premier companies in health and wellness of the employees.

I am proud to fully support the CNSC licence renewal request.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dr. Robert J. Neville'.
