Dear Members of the Commission,

Re: Cameco's Licence Renewal Application to renew the Class IB nuclear fuel facility operating licence for the Port Hope Conversion Facility (November 3-5, 2026 Hearing)

Bruce Power is an electricity company based in Bruce County, Ontario. Our 4,200 employees are the foundation of our accomplishments and are proud of the role they play in safely delivering clean, reliable, nuclear power to families and businesses across the province and cancer-fighting medical isotopes around the world. Bruce Power has worked hard to build strong roots in Ontario and is committed to protecting the environment and supporting the communities in which we live.

Bruce Power requests the opportunity to orally present at the upcoming Hearing for Cameco Corporation (Cameco) to renew the Class IB nuclear fuel facility operating licence for the Port Hope Conversion Facility. Cameco shares similar values to Bruce Power, with a commitment to Safety First, passion for excellence and has built a solid foundation on protecting the environment, the public and communities in its surroundings.

Bruce Power has worked closely with Cameco for decades and throughout that time, Cameco has demonstrated an unwavering commitment to safe operations, environmental stewardship, and meaningful community engagement.

Situated on the traditional territory of the Saugeen Ojibway Nation (SON), Bruce Power operates eight Candu units and is a key driver of clean energy growth and generation that will play a significant role in helping Canada safely meet its energy needs for decades to come.

Cameco Corporation is one of the world's leading providers of uranium fuel products that support the generation of safe, reliable, carbon-free nuclear energy. The Port Hope Conversion Facility is a strategically important part of Canada's nuclear fuel cycle and the facility plays a vital role in supporting Ontario's electricity system and contributes to Canada's energy security and clean energy objectives.

The nuclear industry in Canada is about more than just low carbon energy. Nuclear power is a cornerstone of a secure and reliable energy future, providing reliable baseload power that Canadians, and people around the world can count on. Nuclear is essential to helping

the world address the climate crisis, while also supplying life-saving medical isotopes, and supporting a strong, secure and resilient Canadian economy.

Bruce Power supports Cameco's application for a 20-year renewal of its operating licence for the Port Hope Conversion Facility. As a Class 1B Fuel Facility Operating Licence holder, the facility operates under rigorous regulatory oversight and has demonstrated its ability to consistently meet and exceed the requirements of its licensing basis and all applicable regulatory obligations.

Safety has always been a hallmark of Cameco's operations. The Port Hope Conversion Facility has consistently achieved strong performance across the CNSC's Safety and Control Areas and has maintained worker radiation exposures well below regulatory limits. The facility's environmental monitoring and compliance programs are mature, comprehensive, and transparent, with performance reports made publicly available for review by community members and stakeholders.

Equally important is Cameco's commitment to open communication and community engagement. The company actively shares information about its operations, welcomes opportunities for dialogue with residents, Indigenous communities, local governments, and community organizations, and demonstrates transparency through regular reporting, presentations, site tours, and participation in community events. This ongoing commitment has helped build trust and confidence within the communities in which it operates.

Based on Cameco's strong record of safe and environmentally responsible performance, its commitment to transparency and engagement, and its significant contribution to local communities and Canada's clean energy future, Bruce Power strongly supports the renewal of the Port Hope Conversion Facility operating licence for a 20-year term. We are confident that Cameco will continue to operate the facility safely, responsibly, and in the public interest.

Thank you for considering our support for this important licence renewal for Cameco and the nuclear industry in advancing Canada's clean energy future.

Sincerely,

**Michael
